

Peponi School

Sports Scholarship

All candidates for a Sports Scholarship will be required to sit the English I and Mathematics I papers. Details of these can be found in the *Academic Scholarship* document.

Our new sports scholarship programme is aimed to help us identify the most promising talent in the area. We pride ourselves on working closely with the IAPS Prep Schools so that we can provide a fair and enjoyable sports scholarship programme for all.

We award full sports scholarships for both boys and girls. As a full sports scholarship applicant, participants are expected to play a variety of sports to a high level and not just their most accomplished sport. We also expect sports scholars to maintain a high standard of behavior on and off the pitch and believe that the correct attitude throughout the season towards all sports should be of the highest standard.

We also offer exhibitions in a particular sport if someone excels in one activity rather than a number of different sports.

The sports scholarship day takes place on a Saturday with the entire focus on sport. Pupils that come for the sports scholarship day will be expected to bring their own sporting equipment and clothing suitable for all activities.

Pupils will be assessed in a variety of different sports including Swimming, Athletics, Racket and Team Sports.

The sports scholarship programme consists of a brief interview with the Director of Sport and then the opportunity to show off their sporting ability in practice and game situations.

Applicants may ask for performances to be observed by a member of the Peponi Physical Education Department at any time during their final year at Preparatory School. A competitive environment would be recommended.

Mr. Marc-Anthony Eysele (Director of Sport)
